wp-config

```
?php
/**
 * The base configuration for WordPress
 *
 * The wp-config.php creation script uses this file during the install.
 * You don't have to use the web site, you can copy this file to "wp-c
 * and fill in the values.
 *
 * This file contains the following configurations:
 *
 * * Database settings
 * * Secret keys
 * * Database table prefix
 * * ABSPATH
 *
 * @link https://wordpress.org/support/article/editing-wp-config-php/
 *
 * @package WordPress
 */

/* ** Database settings - You can get this info from your web host **
/** The name of the database for WordPress */
define( 'DB_NAME', 'wordpress' );

/** Database username */
define( 'DB_USER', 'test' );

/** Database password */
define( 'DB_PASSWORD', 'test' );

/** Database hostname */
define( 'DB_HOST', '172.31.54.129' );

/** Database charset to use in creating database tables. */
define( 'DB_CHARSET', 'utf8' );

/** The database collate type. Don't change this if in doubt. */
define( 'DB_COLLATE', '' );

/**#@+
 * Authentication unique keys and salts.
 *
 * Change these to different unique phrases! You can generate these us
 * the {@link https://api.wordpress.org/secret-key/1.1/salt/ WordPress
```
